Kane

Kane: If Kane, a 5-year-old brown tabby, could speak, he might tell us the story behind his tattered ears, scars, and the BB pellets the vet removed from his body. But it is more likely that this loving, resilient champ would choose not to dwell on the past, but would focus on his hopeful future. With every head-butt, purr, and snuggle, it is clear Kane is expressing his love and gratitude for getting a new chance at life. Kane is an affectionate love-bug ready for a home of his own. Do you have extra love to give? If so, you just might be the hero Kane has been waiting for!
